Introduction

The Homecheck Professional Ground Stability Report assesses whether the property is in a mining area (including past, present or proposed underground or surface mining) or an area of natural ground stability hazard.

Ground Stability is one of the major causes of insurance claims - potential causes are proximity to mining, mineral extraction and natural ground subsidence. The importance of this report is to advise the user that risks are not limited to obvious coal-mining areas but also to other types of potential subsidence hazard.

The report is for use by lawyers and other professionals involved in residential conveyancing. It provides information within the key areas listed below that are not covered by Standard Enquiries of Local Authorities.

SUMMARY

The Summary section of the report presents enquiries in a familiar and easy-to-understand question and answer format. Where a reply to an enquiry is Yes, further details are given for each question.

Unless otherwise stated the answers cover a search band of 0-250 metres from the specified property. Contact details for the data providers are given in the Contacts section at the end of this report.

SECTION A Mining

This section concerns coal mining and mineral extraction. It is designed to highlight land instability issues which may affect the value or enjoyment of the property.

SECTION B Brine and Salt Extraction

This section concerns Brine and Salt Extraction. It is designed to highlight areas that may be liable to subside as a result of activities of the salt industry.

SECTION C Man Made Stability Hazards

This section of the report seeks to identify the existence of landfill and waste management sites together with past industrial land use. Its purpose is to highlight stability issues relating to these activities.

SECTION D Natural Ground Stability Hazards

This section concerns Natural Ground Stability hazards and is designed to highlight land stability issues relating to natural subsidence.

Other Reports

You may also wish to consider reports from our full range covering both Flood and Contamination issues.

Footnotes

(1) The report should only be used in connection with one residential parcel of land (for the purpose of defining a single parcel of land Rule2(2) of the Local Land Charges Act 1997 is used). The report is based on the address and grid reference shown on the cover of this report and the replies are given in reliance on the accuracy and completeness of this information.

(2) The report is supplied subject to our current standard terms and conditions.

(3) The search is based on a UK National Grid Reference for the property. The grid reference used is shown on the cover of this report.

(4) The information in the report is supplied under licence to Sitescope Limited from various sources including: Environment Agency, British Geological Survey and Ordnance Survey.

(5) This report is a search of statutory and non-statutory sources of information which does not include any on-site survey or inspection of the property or its environs. Accordingly the report cannot in any way provide information as to the actual state of the property or land.

(6) The replies in this report are based on information currently supplied to Sitescope Limited by its data providers. Sitescope cannot guarantee the accuracy or the completeness of any information supplied to it by its data providers.

(7) Homecheck Professional is a Sitescope Product provided by Landmark Information Group Limited.

Date of Report: 6/11/2011
**SECTION A  Mining**

**Mining Areas**

| A.1 | Is the property within an area where there has been recorded mining activity? | within 0 - 250 metres? | No |

**Coal Mining Areas**

| A.2 | Is the property within an area where a full coal mining report should be obtained? | within 0 - 25 metres? | No |

**Non-coal Mining**

| A.3 | What is the potential for ground instability relating to non-coal mining in the search area? | within 0 - 250 metres? | Likely |

*The British Geological Survey has assessed the area of search as having a likely likelihood of property damage from subsidence relating to non-coal mining. The likely risk does not necessarily mean there is cause for concern. Inspection of the site may be required and a house buyers survey should be considered to test for signs of property damage that may relate to non-coalmining.*

**Natural and Man-Made Cavities**

| A.4 | Are there any Natural/Man-Made Cavities identified within the search area? | within 0 - 250 metres? | No |

**Mineral Extraction and Quarrying**

| A.5 | Are there any Mineral extraction sites as recorded by the British Geological Survey? | within 0 - 250 metres? | No |

**Mining and Quarrying Activities**

| A.6 | Are there any features identified from Landmark’s Potentially Contaminative Industrial Uses (Past land Use) data relating to Mining / Quarrying activities? | within 0 - 250 metres? | Yes |

*see additional information*

**SECTION B  Brine and Salt Extraction**

| B.1 | Is the property within an area defined as being affected by Brine and Salt Extraction? | within 0 - 250 metres? | No |

*see additional information*

**Landfill Sites**

| C.2 | Are there any Landfill Sites? | within 0 - 250 metres? | No |
C.2.1 The following list shows if local authorities covering the area of search have made landfill data available.

- Chichester District Council - Has no landfill data to supply
- West Sussex County Council - Has supplied landfill data

Please refer to the Contacts section for contact information.

**Licensed Waste Management Facilities**

C.3 Are there any currently Licensed Waste Management Facilities?

- within 0 - 250 metres? No

**Boreholes**

C.4 Are there any BGS Boreholes identified?

- within 0 - 50 metres? No

**SECTION D Natural Ground Stability Hazards**

**Natural Ground Stability Hazards**

D.1 What is the potential for natural ground instability in the search area?

- High

The BGS indicate that there is a high potential for natural ground instability in the search area. This does not necessarily mean there is cause for concern in terms of property stability, however we recommend that specific advice be commissioned from a qualified member of the RICS. Please refer to the Additional Information section for details of records found and details of how natural ground instability is broken down into its components.

**Footnotes:**

- Question A.2 The reply to this question indicates whether it is advisable to obtain a coal mining search from the Coal Authority.
- Question A.3 The data provides an assessment of the likelihood that past underground mining may have occurred in the area based on information supplied by the BGS. The data takes into account many types of mining such as ironstone or limestone extraction, but specifically excludes coal. The mining hazard data includes all known underground workings, regardless of depth.
- Question A.5 The reply to this question is based upon the BGS compendium of mines, quarries and mineral sites operating commercially in England and Wales since 1993. The original data was compiled by BGS in 1993-94 primarily from BGS records and from information supplied by local authorities, industrial sources and the Valuation Office Agency.
- Question A.6 Historical maps are a valuable and recognised source of information for investigating site history. They assist in identifying any previous potential contaminative uses relating to Mining / Quarrying which may have been carried out at a particular location.
- Question C.1 Historical maps are a valuable and recognised source of information for investigating site history. They assist in identifying any previous potential infilling of land which may have been carried out at a particular location that may affect Ground Stability.
- Question C.2 The Landfill Sites have been provided by the relevant environment agency or Local Authority (where available). At present no complete national data set exists for landfill site boundaries, therefore, a point grid reference, provided by the data supplier, is used for some landfill sites. In certain cases the point grid references supplied provide only an approximate position, and can vary from the site entrance to the centre of the site. For Registered Landfill Sites, where the positional accuracy of the site is unclear, a “buffer” is constructed around the point to warn of the possible presence of landfill.
- Question D.1 The search band for this question is 0 - 50 metres from the specified property.

If there is a positive answer to questions A5, C2, C3 or C4 the feature will be displayed on mapping in the Additional Information section.

The search results for natural subsidence above indicate the likelihood of each hazard occurring within the buffer zone. An indication of a hazard does not necessarily mean that a particular property will be affected by subsidence problems, as this also depends on factors such as property type or proximity to trees. How a particular property may be affected can only be determined by a more detailed search and/or further investigation of the site and property.

Shrink-Swell Clay Hazard
Swelling Clays can change volume due to variation in ground moisture. This can cause ground movement, particularly in the upper 2 metres of the ground that may affect foundations. Ground moisture variations can be related to a number of factors, including weather variations (annual or longer term), vegetation effects (particularly growth or removal of trees) and man-made activity.
Collapsible Ground Hazard
Certain kinds of rock have an open porous structure, which means they can collapse suddenly when a load is placed on them (such as a building) or when they become saturated, causing potential damage to overlying property.

Compressible Ground Hazard
Certain types of ground, such as that developed beneath river plains, can contain very soft layers or pockets. These can compress under the weight of overlying structures, such as buildings, resulting in progressive depression of the ground and disturbance of foundations.

Ground Dissolution Hazard
Ground dissolution occurs when certain types of bedrock contain layers of material that can dissolve within the ground water. This can cause underground cavities to develop that, with time, can reach the surface and cause significant ground movement, such as development of collapse hollows that can directly impinge on buildings.

Landslide Hazard
Landslide hazard occurs due to particular types of slopes becoming unstable under certain circumstances, causing down-slope movement of the ground and disruption to buildings. A combination of factors, including, amongst others, the rock type, the presence of excess water (natural or relating to man-made activity), the angle of the slope, and construction work, for example, cuttings or embankments, can all contribute.

Running Sand Hazard
Some rocks can contain loosely packed sandy layers that can become fluidised by water flowing through them. This may happen, for example, around natural springs, or where excavations in sand go below the water table, or around leaking drains and mains water supply pipes. Such sands can 'run', removing support from overlying buildings and causing potential damage.

You will pay the Fees at the rates set out in Our or Our Authorised Reseller's invoice within 30 days of the date of each invoice without deduction, counterclaim or set off. Where Your order comprises a number of Services or severable elements within any one or more Services, any failure by Us or its Authorised Reseller to provide an element or elements of the Services shall not prejudice Our or Our Authorised Reseller's ability to require payment in respect of the Services delivered to You. You acknowledge that time is of the essence with respect to the payment of such invoices.
   b. VAT shall be due in addition to any Fees. You shall pay any other applicable indirect taxes related to Your use of the Services.
   c. Neither We nor any Authorised Reseller shall be required to notify You in advance of any amendment to the Fees and the placing of any further Order for Services shall be deemed acceptance of any revisions to the Fees.
   d. If You fail to pay the due date any amount due and payable by You under the Agreement, We shall be entitled, but not obliged to, charge You interest on the overdue amount, payable by You immediately on demand, accruing from the due date up to the date of actual payment, after as well as before judgment, at the rate set out in the Late Payment of Commercial Debts (Interest) Act 1998 from time to time and fixed sum compensation under the Late Payment of Commercial Debts Regulations 2002. Such interest shall accrue on a daily basis.

   a. Nothing in these Terms excludes or limits either party's liability for death or personal injury caused by that party's negligence or wilful default or for fraud, and the remainder of this clause 6 is subject to this provision. If You are a Consumer, Your statutory rights (which include, for example, that We will provide the Services to a reasonable standard and within a reasonable time) are not affected by anything in these Terms.
   b. Save as set out in clause 6.a, We shall not be liable to You or to any End User in contract, tort (including negligence) or for breach of statutory duty or in any other way for:
      i. any indirect or consequential losses (which includes any loss that could not have been reasonably expected by You and Us at the time of entering into these Terms);

   d. The Content that Services are based on is derived from third party sources. Therefore, save as set out in clause 6.i in respect of risk assessments and professional opinions, We do not warrant the accuracy or completeness of any information or Content provided, unless We should reasonably have been alerted to any omission, error or inaccuracy in the Content. Such Content is provided specifically from the sources as described by Us and We do not claim that these represent an exhaustive or comprehensive list of all sources that might be consulted.
   e. You acknowledge and agree that neither You nor any End User shall have any claim or recourse against any Supplier of Third Party Content.
   f. You acknowledge and agree that We do not warrant that the online supply of Content or Services or any internet ordering service will be: uninterrupted or error free or provide any particular facilities or functions; free from defects; free from software viruses; free of error from computer malfunction, inaccurate processing; free from corruption of data whilst geo-coding, processing by computer or electronic means or in the course of transmission; or similar, although We will use reasonable endeavours to correct any such issues within a reasonable period of time becoming known (which may be limited by the time on another), Time shall not be of the essence in providing the Content or Services.
   g. You acknowledge and agree that no physical inspection of the Property Site reported on is carried out as part of any Services offered by Us and We do not warrant that all land uses or features whether past or current will be identified in the Services. The Services do not include any information relating to the actual state or condition of any Property Site nor should they be used or taken to indicate or exclude actual fitness or unfitness of a Property Site for any particular purpose nor should it be relied upon for determining salability or value or used as a substitute for any physical investigation or inspection.
   h. You acknowledge and agree that We will not be held liable in any way if a Report is used otherwise than as provided for in these Terms and/or in the Report.
   i. You acknowledge and agree that the Services have not been prepared to meet Your or anyone else's individual requirements and it is Your responsibility to ensure that the Services ordered are suitable for You (or the End User's) intended purpose.
   j. You acknowledge and agree that You shall, on receipt of a Report carry out a reasonable inspection to satisfy Yourself that there are no apparent defects or failures with respect to the description and location of the Property Site and shall promptly inform Us if there are any such defects or failures.
   k. All liability for any insurance products purchased by You rests solely with the insurer. We do not endorse any particular product or insurer and no information contained within the Services shall be deemed to imply otherwise. You acknowledge that if You Order any such insurance We will deem such as Your consent to forward a copy of the Report to the insurers. Where such policy is purchased, You acknowledge and agree that all liability shall remain with the insurers and that You are entirely responsible for ensuring that the insurance policy offered is suitable for Your needs and should seek independent advice. We do not guarantee that an insurance policy will be available on a Property Site. You acknowledge and agree that all decisions with regard to the offer of insurance policies for any premises will be made solely at the discretion of the insurers and We accept no liability in this regard. The provision of a Report does not constitute any indication by Us that insurance will be available on the Property Site.
   l. We may provide You with professional opinions or a risk assessment in a Report. You acknowledge and agree that We shall carry out (or procure that third parties carry out) such assessment with reasonable skill and care and that We shall be liable where any such risk assessment is carried out negligently. Notwithstanding the foregoing We shall not be liable for any inaccurate statement, opinion or risk rating in a Report which resulted from a reasonable interpretation of the Content.
   m. Neither You, nor any End User or any other person may rely on a Service more than 12 months after it was originally provided.
   n. You shall use all reasonable endeavours to ensure that End Users acknowledge and agree to the limitations and exclusions of liability set out in this clause 6.

Nothing in this clause 7 shall operate to override or vary the provisions of clause 6.

      d. Without prejudice to Your other rights and remedies under the Agreement, the maximum sum that shall be contributed by Us in respect of any Contribution shall be limited to £60,000. In the event that more than one Report is purchased on the Property Site the Contribution will only be payable under the first Report purchased by or on behalf of any First Purchaser or First Purchaser's Lender and no Contribution will be made in respect of subsequent Reports purchased by or on behalf of such First Purchaser, First Purchaser's Lender or any person connected to them.

This clause 7.h and the service of any notice under it shall not affect the provisions of clauses 7.e and 7.g, and any such communications, even if advised to Us will not operate as notice under clause 7.e.
   i. We reserve the right at any time prior to a claim for Contribution being made in accordance with clause 7.g above, to withdraw the offer of payment of Contributions without further notice.

Unless otherwise agreed between the parties, the mediator will be nominated by the Centre for Effective Dispute Resolution. To initiate the mediation a party shall give notice in writing to the other party to the dispute requesting a mediation. The mediation will start not later than 21 days after the date of service of such notice. If the Dispute has not been resolved to the mutual satisfaction of the parties within 60 days (or such other period as they shall agree) after the date of service of such notice then either party may refer the Dispute to the courts in accordance with clause 11.f.

e. You shall ensure that each End User complies with and is bound by the Terms and shall procure that We may in Our own right enforce such terms and conditions against the End User pursuant to the Contracts (Rights of Third Parties) Act 1999.
